PROJECTS

ReportNRepair – Civic Issue Reporting Web App (Frontend Developer) [Live link](#)

Built the frontend of a civic issue reporting platform using React, Tailwind CSS, and DaisyUI. Designed responsive, role-based interfaces for citizens, admins, and workers—enabling issue reporting, emergency submissions, and dashboard interactions. Focused on clean UI, smooth navigation, and mobile-friendly layouts.

PetCare Hub – Animal Welfare Web App [Live link](#)

Developed the frontend of an animal welfare platform aimed at supporting stray animals and connecting users with NGOs and emergency services. Designed key features including report-animal forms, multilingual interface, symptom checker, health passport, and NGO admin dashboard using ReactJS, Tailwind CSS, and React Router. Prioritized accessibility and user-centered UI with responsive layouts.
